## HARRIS COUNTY WCID No 50 SANITARY SEWER REHABILITATION PHASE II

Dear Resident:

We are currently working on a sanitary sewer rehabilitation project to rehabilitate the sanitary sewer main line in your area. Our company employees and any subcontractors will have I.D badges displayed. We will be working either in the front or rear easement of your property during this contract period and in several phases. During this time, we will need access to your property to rehabilitate the sanitary sewer main line and reconnect your service line. We are asking residents to leave their gates unlocked and to please secure all pets if applicable, (you will receive a 48-hour notice for this process). You should not have disruption to your sewer or water service. Restoration will follow about one week behind the completion of work. After rehabilitation is complete if you are experiencing slow moving sewer or sewer backup call us immediately. Our sewer schedule is as followed.

**Phase 1 - Pre-Clean & Televiser sanitary sewer (1/21/2019 to 1/31/2019)**

Phase 2 - Rehabilitate sanitary sewer lines (48-hour Notice given)

Phase 3 - Restoration (Approximately one week after Rehab)

Phase 4 - Rehabilitate sewer manholes (48-hour Notice given)

Phase 5 - Post Television of rehabilitated sewer lines

Phase 6 - Final walkthrough

Should you have any questions feel free to contact me:
